

TIM CHAMBERS AND MICHELE BRUNI

InspiraFarms enables emerging market smallscale farmer cooperatives to reduce food waste and access high-value markets by supplying turnkey affordable cold storage and post-harvest processing facilities and equipment.

JENNIFER BREATON AND REBECCA WIERING

In order to meet the increasing demand for alternative protein sources, Zeewaar is cultivating and building a supply chain of sustainable seaweed production for B2B and B2C business lines, with the added value of restoring the seas and oceans where seaweed is sustainably cultivated.

PETER HEIJEN

Lendahand is a crowd-funding platform that provides debt finance and training to SMEs in developing countries, such as Colombia, Ghana, Zambia, Mongolia, the Philippines, and Cambodia.

ROGER FRANK

Innovare provides financing for East African agriculturally focused SMEs and enables them to lease equipment needed for production, harvesting and processing. In turn, this increases demand for smallholder production which improves livelihoods.

CRISTIAN BELLO

Bomberbot is a digital learning tool that teaches primary-school age boys and girls to computer code, which allows them to access information, connectivity, and gradual employment. The first of its kind in Europe, Bomberbot is in 630 schools in Holland, in 270 schools in Finland and ready to scale.

VIGGA SVENSSON

VIGGA is a circular-economy, subscription-based baby-clothing company, which offers ease for new parents, and cuts the expense, water, and toxicity of one of the most polluting retail lines: infant and toddler baby clothes. The VIGGA product-as-service-model enables parents to lease organic kid's wear.
